Supports

Social Skills

Our nine week Therapeutic Residential Placement is available to all Victorian clients with a diagnosis of an autism spectrum disorder and aged between 6 to 16 years. Our highly individualised intervention program is based in Mansfield, Victoria.

Clients from across the state spend nine weeks living at our residence and attending our school. This 24/7 care model provides a highly supportive and consistent environment structured to reduce anxieties and build capacity to learn new skills.

We provide a healthy autism environment that is rich in positive behaviour supports, evidence based practices, visuals, routines and schedules. We provide a comprehensive assessment, planning and intervention that focuses on the individual's needs, the environment and quality of life.

Our program is designed with activities to reduce anxiety - clients participate in these activities alongside individualised interventions. Activities include: Yoga, Healthy Eating, Massage, Equilearn, Music, Bush Walks, Art and Swimming.

Our curriculum reflects the skills required to successfully engage in everyday life.

Each term we can have up to eight residential clients and up to four day clients who participate in highly individualised learning programs. We have three classrooms each with a teacher and an assistant.

We encourage families and teachers to spend time at our Mansfield Campus to gain a greater understanding of best practice management strategies.
