

Stronger Families - Early Intervention

A 3 night program for the whole family! A time to relax, recharge and connect with others while supported by caring, compassionate, autism trained professionals

Autism Specific

This program targets young children (up to 7 years old) and their families. It aims to build essential developmental skills such as communication, sensory-motor skills, self-care, social interaction and everyday participation. It is designed and led by Allied Health Professionals.

Making Connections

It is the community of our program that makes it so special. Our families find immense value from the support of other families going through similar experiences. Parents connect and have time out together. Siblings enjoy their own program. Autistic young people meet and support each other.

A supportive family getaway with a range of activities

Practical and inclusive support and respite at our farm facilities for the whole family. We offer a balanced schedule with parent education, relaxation, time in nature, movement, play, sensory experiences and healthy foods.

Health and Wellbeing

We ditch the screens and engage in simple activities for health, wellbeing and development. We love getting outdoors and enjoying nature.
